

FLEET MANAGEMENT CHECKLIST

Premier
TRAILER LEASING

Monthly Trailer Tracking:

- **Check trailer location:** Use GPS tracking to monitor the location of your trailers in real-time. Verify that each trailer is where it's supposed to be and that it's not being used without authorization.
- **Check trailer status:** Monitor the status of each trailer, including whether it's loaded or empty, and whether it's attached to a tractor or not. This information can help you optimize trailer utilization and prevent theft.
- **Review trailer utilization:** Review trailer utilization reports to see which trailers are being used the most and which ones are being underutilized. This information can help you optimize your trailer fleet and reduce costs. Also make sure to check for long detention times.
- **Check for theft or unauthorized use:** Use trailer tracking data to identify any instances of theft or unauthorized use of trailers. Report any suspicious activity to the appropriate authorities.
